

Curriculum Vitae

Traci K. Campbell, P.E., CXLT, Senior Engineer

850.583.5513 · TCampbell@Qforensics.com

BACKGROUND

Ms. Campbell has over 22 years of experience investigating, analyzing, and testifying in matters involving a variety of forensic engineering issues. She is a leading expert in the following: industrial accident reconstruction and human factors; slip, trip, stumble and fall analysis; application of standards, codes, and guidelines including OSHA, ANSI, ASTM, Life Safety, ADA and Building Codes; workplace safety related issues; forklift and material handling devices; construction machinery and workplaces; manufacturing equipment; and the analysis of workplace systems and product failures. Ms. Campbell has a strong background working in manufacturing and industrial workplaces including the design, development, and implementation of solutions to ensure safe work environments. She has also been credited as part of a team holding a patent related to safeguarding power hand tools with rotating discs. Her special interests include amusement park and theme park accidents and safety related issues. Ms. Campbell is also a CXLT - Certified XL Tribometrist (slip index evaluation) and a certified counter balance forklift operator.

Ms. Campbell has served as a presenter with the American Society of Safety Professionals (ASSP) regarding slip, trip, stumble, and fall incidents. She has shared her engineering expertise with many organizations on topics including: slip, trip, stumble, and fall incidents; electronic data in the realm of accident reconstruction; safety engineering and the engineering hierarchy; photogrammetry and other accident reconstruction techniques; OSHA compliance; and Industrial Engineering. Ms. Campbell is a registered and licensed Professional Engineer in five states and she continues to refine her skills and knowledge of premises liability and safety engineering by staying current with new technology and best practices.

AREAS OF EXPERTISE

- Industrial Accidents
- Slips, Trips & Falls
- Human Factors and Environment Interaction
- Pedestrian Kinematics
- Workplace Safety
- Retail and Restaurant Facility Safety
- OSHA & ADA Regulations
- Multi- Employer Workplaces
- ANSI, ASTM & Building Codes
- Elevators/Escalators
- Industrial Equipment
- Forklifts and Material Handling Devices
- Parking Lot Safety
- Safety Engineering
- Guarding and Warnings
- Theme Parks & Recreation Facility Safety
- Fire and Explosion Safety
- Product Failure Analysis
- Pedestrian Accidents
- Automobile Collisions
- Tractor-Trailer Collisions
- Bicycle Accidents

PROFESSIONAL LICENSES & CERTIFICATIONS

- Licensed Professional Engineer, Florida, #63873
- Licensed Professional Engineer, Georgia, #PE032296
- Licensed Professional Engineer, Alabama, #PE28799
- Licensed Professional Engineer, South Carolina, #ELS.28337 E
- Licensed Professional Engineer, Mississippi, #27918
- Certified XL Tribometrist, #1301463
- Certified Counter Balanced Forklift Operator
- Certified Fire and Explosion Investigator (CFEI), #8820-3789, 2002-2007

EDUCATION

- B.S., Industrial Engineering, Florida State University, Tallahassee, FL, 1993

PROFESSIONAL EXPERIENCE

2019 – Present	Quality Forensic Engineering, LLC Senior Engineer, Tallahassee, FL
2001 – 2019	BEC Consulting, LLC Senior Consulting Engineer, Tallahassee, FL
1996 – 2001	General Motors Corp. Senior Industrial Engineer 1999-2001, Warren, MI Lean Manufacturing Engineer 1998-1999, Shanghai, China Industrial Engineer 1998, Lake Orion, MI Industrial Engineer 1996-1998, Atlanta, GA
1994 – 1996	Stanadyne Automotive Corp. Industrial Engineer 1994-1996, Tallahassee, FL MRO Buyer 1993-1994, Tallahassee, FL

NOTABLE PROJECTS

Overhaul and Retrofit Existing Manufacturing Facility

In one of her first assignments with General Motors Corporation, Ms. Campbell was an Industrial Engineer responsible for the overhaul and retrofit of an existing manufacturing facility in Atlanta, GA to prepare for the production of a new line of vehicles. As part of the team of engineers responsible for the Body Shop area of the plant, she was responsible for the design and implementation of new workstations for approximately 50 operators and highly automated robotic and conveyor systems used for welding and material handling, while working within the confines and constraints of an existing building. This included balancing the aggressive needs of production quotas against the safety and well-being of the people performing the work.

Construction, Installation, and Implementation of new Manufacturing Facility

For a project that represented the first manufacturing venture for General Motors into mainland China, Ms. Campbell was an Industrial Engineer in Shanghai, China. She was responsible for not only the design and implantation of new workstations and workplace layout for the production of passenger vehicles, but also for a part of the team responsible for the construction of the manufacturing facility from brick one in an open field. The challenges included the “normal” processes of installation of new manufacturing equipment and production lines but also the added complexity of training and educating workers who were thrust into a new business with a new work ethic and culture. This 18-month project incorporated every aspect of manufacturing including material handling container design presentation, transport of materials, workplace safety and layouts, and safety, human factors, and ergonomics.

Forensic Engineering

As a Senior Engineer providing high level engineering and problem analysis, Ms. Campbell has been responsible for a variety of forensic engineering projects, including:

- Slip, Trip, Stumble and Fall Incidents
 - Coefficient of friction
 - Obstacles in pathways
 - Changes in elevation
 - Illumination
 - Bathrooms, bathtubs, and showers
- Stairways and Ramps
 - Stair geometry including treads, risers, and handrails
 - Ramp inclines and materials
- Material Handling Incidents
 - Forklifts and Pallet Jacks
 - Stability of pallets and loads
 - Powered Industrial Equipment
 - Interaction with pedestrians
- Retail and Restaurant Incidents
 - Interaction with floors, fixtures, carts, and furniture
 - Obstacles in aisleways
 - Falling merchandise
- Parking Lot Incidents
 - Pedestrian and Vehicle interactions
 - Wheel stops
 - Speed bumps
 - Manhole covers and storm grates
- Safety Engineering
 - Sound levels
 - Multi-employer workplaces
- ADA Compliance
 - Ramps and curb ramps
 - Parking spaces
- Guarding and Warnings
 - Identification and elimination of hazards
 - Guarding of hazards
 - Floor holes, openings, and edges

- Warning of hazards
- Use of equipment, products, and machinery
- Elevator and Escalator Incidents
 - Leveling of Elevators
 - Guarding of Elevators and Escalators
 - Instructions and warnings for Elevators and Escalators
- Amusement and Recreational Incidents
 - Instructions and warnings for use and participation
 - Facility Safety
 - Guarding and Warnings
- Vehicular accident reconstruction
- Bicycle and Pedestrian accidents
- Tractor-trailer accident reconstruction
- Engineering Data Recorder downloads

PROFESSIONAL ASSOCIATIONS

- American Society of Safety Professionals (ASSP)
- American Society for Testing and Materials (ASTM)
 - E30 Committee - Forensic Sciences
 - E30.02 Questioned Documents
 - E30.11 Interdisciplinary Forensic Science Standards
 - E30.12 Digital and Multimedia Evidence
 - E30.92 Terminology
 - E34 Committee - Occupational Health and Safety
 - E34.01 Terminology
 - E34.30 Occupational Health and Safety in Construction
 - E34.40 Hazard Communication
